

Job Posting
May 24, 2011

Position: Toolmaker/Machinist
Reports to: Manufacturing Manager
Hours: Full-time, 1st and 2nd shifts

Job Duties:

Create, modify and repair tooling, fixtures and custom machine tool components. Work independently and with other departments. Prioritize job functions. Read and interpret blueprints and other specifications to understand product and determine materials, methods and order of operation required to make parts. Produce part programs using Mastercam and/or G code. Initially work in tooling department to learn company tools, practices and standards; job functions will include assignment to our production departments to help improve our programming/setup requirements

Skills:

Must be able to work within close tolerances, use precision measuring tools, use advanced shop mathematics, operate both CNC milling and turning and manual machinery. Able to stand, bend, stoop and lift minimum of 25 lbs, maximum 50 lbs

Reasonable accommodations will be made to enable individuals with disabilities to perform the essential functions of the job.
