

Helical Products Company, Inc. does not believe that Material Safety Data Sheets are necessary, nor required for our products when used in the manner for which they are specifically designed and intended. The Occupational Safety and Health Administration Hazard Communication section 29 CFR 1910.1200 states that it does not apply to "articles".

An article is defined as a manufactured item:

- a) which is formed to a specific shape or design during manufacture;
- b) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and
- c) which does not release, or otherwise result in exposure to, a hazardous chemical, under normal conditions of use.

Based upon this definition, all products manufactured by Helical qualify as MSDS exempt "articles".

If our product is modified in any way or used in a manner for which it is specifically not intended, then please contact our Customer Service Representative to request additional information relating to any possible risks of exposure.
